Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4, 5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Green et al.

Green et al. shows, figure 4, an air bag cushion 44, which in the deflated condition lies within and fills an opening in the dash which canister 48 defines with walls 52a, 52b, 54 and 56. The plane of the vehicle instrument panel is defined by the under side of mounting flange 58. The air bag cushion is immediately adjacent to the defined opening and is deployable through the opening. The upper fold of air bag cushion 44 both completely closes the opening (notice that the air bag cushion touches both sides of the opening) and is flush with the vehicle instrument panel. The system is defined in combination with a vehicle.

Note the open “comprising” language of the claims. The Green et al. system shows a cover 42, which overlays the air bag cushion 44. This does not preclude the reference from reading on the broadly recited claims. The examiner is relying on yourdictionary.com adjective definition for “flush”, “a. Having surfaces in the same plane; even. b. Arranged with adjacent sides, surfaces, or edges close together”.

Response to Arguments

Applicant's arguments filed 10/28/04 have been fully considered but they are not persuasive.

Applicant asserts that newly added limitations of “immediately adjacent” and “skin completely closes the opening” are neither taught nor disclosed by Green et al. The examiner does not concur. The air bag cushion touches both sides of the opening, which completely closes the opening and also makes it immediately adjacent.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
